

PhD course in BIOMEDICAL INNOVATION

*Are you passionate about your
research having a societal impact?*

The Department of Biomedicine, AU, invites you to participate in our PhD course in Biomedical Innovation

The course introduces and trains participants in biomedical focused innovation and how to translate your basic research into new medical treatments addressing patient unmet needs

Mix of lectures and case study performed in groups
Invited guest lecturers will share their insights and experiences

6-day course spread over 3-4 weeks (5 ECTS)

The course was first launched in the spring of 2025, and will be offered again in 2027

**2027 course application deadline will be announced in
September 2026**

Questions can be sent to palsgaard@biomed.au.dk
